

# Municipal Class Environmental Assessment pumping station, forcemain and gravity sewer to divert sanitary sewage flows from Bowmanville to Courtice in the Municipality of Clarington

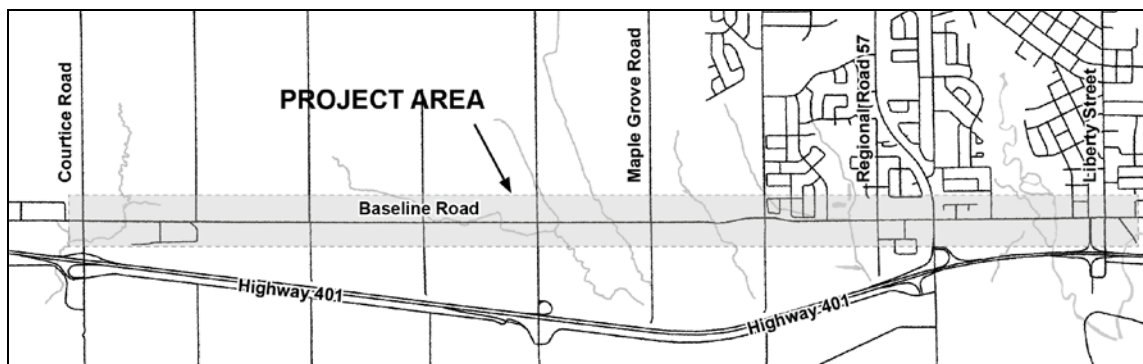

## NOTICE OF STUDY COMMENCEMENT

WORKS DEPARTMENT

August 11, 2010

PUBLIC NOTICE

To address the current shortage of wastewater treatment plant reserve capacity for Bowmanville, a Municipal Class Environmental Assessment (Class EA) is being undertaken by the Bowmanville Landowners Group Inc. and the Region of Durham as co-proponents. This study will evaluate alignment and location alternatives for a proposed sewage pumping station and associated forcemain and gravity sewer to divert flows from the Bowmanville urban area to the proposed Courtice Trunk Sanitary Sewer within the Municipality of Clarington as shown on the key plan below. The study area includes Baseline Road from 200 metres east of Liberty Street to Courtice Road.

The study will proceed in accordance with 'Schedule B' of the *Municipal Class Environmental Assessment, June 2000, as amended in October 2007*. The study will confirm the need and justification for the project, identify alternative solutions to the defined problem and opportunity statement, and select a preferred implementation strategy. The alternative solutions will consider the effects on public safety, natural environment, social environment, economic environment and cultural environment.

Public input during the planning process of this project is encouraged. Comments will be maintained for reference throughout the project and will become part of the public record. Under the Freedom of Information and Protection of Privacy Act and the Environmental Assessment Act, unless otherwise stated in the submission, any personal information such as name, address, telephone number and property location included in a submission will become part of the public record files for this matter and will be released, if requested, to any person.

Public consultation will be scheduled during the study to provide additional information, answer questions regarding the project, identify the alternative and preferred solutions being evaluated, and solicit feedback and comments. Notices advising of the date, time and location of public information centres will be mailed to all stakeholders and advertised in the local newspaper.

If you have any comments or questions, require any further information about the study or the Municipal Class Environmental Assessment process, or wish to be included on the list of stakeholders, please contact either of the persons listed below.
