How will a waterfront park benefit Courtice?

It will provide lower part of Courtice with a paved walking trail.

What would you like to enjoy doing along the waterfront?

Walking

Eating

- Picuic
- Restauraut

Clarington

PUBLIC MEETING #1 03 DECEMBER 2019

## **DURHAM REGION CYCLING COALITION**

CLARINGTON ACTIVE TRANSPORTATION & SAFE ROADS COMMITTEE

The DRCC along with the CAT&SRC would like to see safe access to the proposed park by means other than a vehicle. At present there is a high volume of Durham York Energy traffic using Courtice Rd when exiting the 401 at exit 425.

This is on the corridor of Ontario's signature WFT which attracts visitors from far and wide who are usually on bicycle. There will be increased traffic as the new energy campus takes shape to say nothing about the current/present high traffic volumes as OPG-Darlington staff enter and leave by this route.

We are strongly suggesting that due consideration is given to the amount of traffic that will be present in this area.

Jim Boate For DRCC & CAT&SRC

Subject: Accessibility

Ŕ

#### Hello Paul and Carlos,

As I will be unable to attend the Energy Park& Courtice Waterfront PIC, I would like submit a request for a safe access route to this proposed waterfront park. At present we the residents of Courtice do not have safe access to the Waterfront Trail or the DPP.

We have repeatedly asked for a safe access by creating a MUP along the side of Courtice Rd (DR 34) between Baseline Rd and MegaWatt Dr, or a pedestrian/bicycle bridge over the 401 as seen in other municipalities. Please note these concerns in any future planning for this proposed Waterfront Park. At present all the residents currently live to the north of the 401.

Thanks, Jim Boate Clarington AT & SRC

Subject: Courtice Waterfront Study Feedback

Courtice, being wedged between Oshawa and Bowmanville, has no discernible personality. As the de facto gateway to Clarington from the west, neither Courtice's nor Clarington's image is enhanced when the first thing that a visitor encounters is the energy-from-waste facility. So the establishment of a waterfront park would raise Courtice's municipal profile and help to balance the negative visual of the incinerator for the entire municipality of Clarington.
